Art Unit: 2818

### **DETAILED ACTION**

## Specification

1. The disclosure is objected to because of the following informalities:

The use of a preamble of a patent claim (page 1, line 9-10) for describing the invention is unclear since the patent disclosed in the specification is unknown and it is not consistent to refer the invention to a patent claim.

Appropriate correction is required.

### Information Disclosure Statement

2. The information disclosure statement filed 12/27/02 contains a Japanese Patent document that fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the name of the inventor is missing and there is no explanation of relevance. Accordingly, the document has not been considered.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent

Art Unit: 2818

4. Claims 1-6, 9/(1-6), 10/(1-6), 10/9/(1-6), 11/(1-6), 11/9/(1-6), 11/10(1-6). 12/(1-6), 12/9/(1-6), 12/10/(1-6), 12/10/11(1-6) are rejected under 35 U.S.C. 102(a) as being anticipated by the admitted prior art.

The admitted prior art (Fig. 2) shows a read/write amplifier for a DRAM memory cell (15) having all the elements as recited in claims as follows:

- at least one bit line (12) and at least one reference bit line (13);
- the first read/write amplifier (left amplifier 20);
- the second read/write amplifier (right amplifier 20);
- the individual components (21, 22, 23, 24 and 25) divided between the two read/write amplifier elements (20).

# Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art in view of Shimohigashi (US Patent No. 4,367,540 cited by applicant.

The only difference between claims 1-14 and the admitted prior art (Fig. 2) is the connections of the bit line pairs to both read/write sense amplifier elements. However, Shimohigashi discloses the use of a bit line pair connected

of the Invention).

to both sense amplifiers at two ends of the bit line pair for externally deliver an amplified output from either of the pair of sense amplifiers (column 1. Summary

# Allowable Subject Matter

7. Claims 15-20 are allowed.

Claims 15-20 recite a method for evaluating DRAM memory cells of a DRAM memory having some steps that are not found in the prior art, such as steps e)-g). The advantage of the invention is to use a single read/write amplifier simultaneously to evaluate a plurality of bit line pairs in a single memory cell array.

### Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tanaka et al. discloses a semiconductor memory device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huan Hoang whose telephone number is (703) 305-3494. The examiner can normally be reached on Mon-Fri 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor. David C Nelms can be reached on (703) 308-4910. The fax phone numbers for the organization where this application or proceeding is

Art Unit: 2818

assigned are (703) 872-8318 for regular communications and (703) 872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956. Maldian
